Panjab University Chandigarh

📅 July 2019 - 2022

BCA (Bachelor's in Computer Application) - 74%

Himachal Pradesh University

📅 2016-2019

PROJECTS

Workspace

- The project summarizes the company management system application.
- The system typically includes modules for managing employees, payroll, inventory, sales, and customer data. It may also provide tools for generating reports, tracking performance metrics, and automating routine tasks.
- With a company management system built in ReactJS, businesses can increase productivity, reduce errors, and make data-driven decisions to grow their bottom line.

Bentect

- Bentect is an Australian Company. In this project, we have to create a web application which provides observation of the product which services they provide, and add any new observations, if any. We can also assign that to the vendor to be fixed.

TQQA

- An e-Commerce website built in ReactJS is a web application designed to facilitate online buying and selling of goods and services.
- With ReactJS, developers can create dynamic and responsive interfaces that enable users to browse products and add them to their cart.
- The website typically includes features such as search filters, product categories, reviews, and ratings to help customers find the right products.

AI Image Generator

- By harnessing the power of AI to generating exquisite visuals that can be individually ungrouped in PowerPoint or Google Slides for simple customization and scaled to any size without sacrificing quality..
